# PILLAR III

at 30 June 2016

## Pillar III: Risks and capital adequacy

The publication of financial information with regard to regulatory capital and risk exposure is conducted on a consolidated basis in compliance with Article 2 of directive 44/G/2007. Other information about the parent company and significant subsidiaries is published separately, in compliance with Article 8 of the same directive.

Pillar 3 of the Basel III framework aims to promote market discipline through regulatory disclosure requirements with regard to supplementary financial communication. These requirements enable market participants to access key information relating to a bank's regulatory capital and risk exposure, in order to increase transparency and confidence about a bank's exposure to risk and the overall adequacy of its regulatory capital.

## I. Capital management and capital adequacy of Attijariwafa bank Group

## 1- Moroccan regulatory framework

The Moroccan regulatory framework is changing in compliance with the principles laid down by the Basel Committee. In 2007, Bank Al-Maghrib put forward the Basel II accord, which is based on three pillars:

 Pillar 1: calculation of minimum capital requirements for various prudential risks: credit risk, market risk, and operational risk;

- Pillar 2: implementation of internal reviews of capital adequacy and risks incurred. This pillar covers all quantitative and qualitative risks;
- Pillar 3: disclosure requirements and standardization of financial information.

Bank Al-Maghrib has also applied the Basel III Committee guidelines for regulatory capital. The new requirements took effect in June 2014.

## 2- Prudential scope of application

Solvency ratios prepared on a parent-company basis (domestic banking) and on a consolidated basis are subject to Basel Committee international standards and governed by Bank Al-Maghrib regulatory directives:

- circular 26/G/2006 (see technical note NT 02/DSB/2007) about the standard calculation of capital requirements with regard to credit, market, and operational risk;
- circular 14/G/2013 (see technical note NT 01/DSB/2014) about the Basel III calculation of regulatory capital of banks and credit institutions.

For ratios prepared on a consolidated basis, in accordance with Article 38 of circular 14/G/2013, the shareholdings of insurance and reinsurance companies shall be treated on a consolidated basis using the equity method, even where the shareholdings are wholly owned or part of a joint venture.

## 3- Capital composition

In June 2014, Bank Al-Maghrib's prudential regulations for the adoption of Basel III entered into force. Consequently, Attijariwafa bank Group is required to comply with, on both an individual and a consolidated basis, a core-capital ratio of no less than 5.5%, a Tier 1¹ capital ratio of no less than 6.5%, and a Tier 1 and Tier 2 capital ratio of no less than 9.5%. In addition to these requirements there is a capital conservation buffer (on the basis of core capital) equal to 2.5% of risk-weighted assets. When the capital conservation buffer is included, the minimum limits are 8% for Core Equity Tier 1 (CET1), 9% for the Tier 1 capital ratio, and 12% for the total.

At the end of June 2016, in accordance with circular 14/G/2013, the regulatory capital of Attijariwafa bank Group comprised both Tier 1 and Tier 2 capital.

Tier 1 capital is determined on the basis of Core Equity Tier 1 capital (CET1) adjusted for: the anticipated distribution of dividends; the deduction of goodwill, intangible assets, and unconsolidated equity investments<sup>2</sup> that are held in the capital of credit institutions and equivalent in Morocco and abroad, and in the capital of entities with banking-related operations in Morocco and abroad; and prudential filters.

Tier 2 capital consists mainly of subordinated debt whose initial maturity is less than five years. An annual discount of 20% is applied to subordinated debt with less than five years of residual maturity. Tier 2 capital is restricted to 3% of risk-weighted assets.

(in MAD thousands)

	June-2016	Dec-2015
Tier 1 capital= CET1+AT1	32,571,718	31,280,435
Items to be included in core capital	40,541,382	38,848,358
Share capital	2,035,272	2,035,272
Reserves	34,406,865	31,956,781
Retained earnings	1,436,683	2,433,472
Minority interests	2,892,854	2,700,195
Ineligible core capital	-230,293	-277,362
Items to be deducted from core capital	-7,969,665	-7,567,923
Core Equity Tier 1 (CET1)	32,571,718	31,280,435
Additional Tier 1 capital (AT1)	-	-
Tier 2 capital	7,937,189	7,517,730
Subordinated debt with maturity of at least five years	7,699,756	7,184,502
Unrealized gains from marketable securities	192,002	248,943

Ineligible Tier 2 capital	-99,000	-70,000
Total regulatory capital	40,508,906	38,798,165

At June 30, 2016, Group statutory shareholders' equity amounted to MAD **32,571,718** thousands. Group Tier 2 capital amounted to MAD **7,937,189** thousands. Total capital amounted to MAD **40,508,906** thousands, 4.4% more than in December 2015.

## Changes of Attijariwafa bank's regulatory capital (in MAD billions)

## 4- Solvency ratios

At 30 June 2016, the Group's Core Equity Tier 1 ratio (CET1) amounted to 10.05% and its capital adequacy ratio stood at 12.50%.

(in MAD thousands)

	June-2016	Dec-2015
Core capital	32,571,718	31,280,435
Total capital	40,508,906	38,798,165
Risk-weighted assets	323,968,917	310,598,834
Core equity Tier 1 ratio (CET1)	10.05 %	10.07 %
Capital adequacy ratio	12.50 %	12.49 %

## II. Capital requirements and risk-weighted assets of Attijariwafa bank Group

At June 30, 2016, total risk-weighted assets for Pillar I, in compliance with circular 26/G/2006 (standards for calculating capital requirements under credit and market risk, using the standardized approach) for Attijariwafa bank Group amounted to MAD **323,968,917** thousands. Risk weighted assets are calculated by means of the standardized approach for credit, counterparty, and market risks, and by means of the Basic Indicator approach for operational risks.

		Pillar I
	Hedged risk	Method for assessment and management
Credit and counterparty risk	√	Standardized approach
Market risk	√	Standardized approach
Operational risk	<b>V</b>	BIA (Basic Indicator Approach)

## Changes in risks in Attijariwafa bank group (in MAD billions)

<sup>1)</sup> Tier 1 capital is composed of equity capital and additional capital (any instrument that can be converted to capital or depreciated when the solvency ratio falls below a predefined threshold of 6%) after deductions and prudential adjustments

<sup>2)</sup> Equity holdings of more than 10% whose historical value is less than 10% of Group Tier 1 capital are weighted at 250%

## • Capital requirements and risk-weighted assets of Attijariwafa bank Group:

The following table shows the annual change of capital requirements and risk-weighted assets under Pillar 1:

(in MAD thousands)

	June-	2016	Dec-2	2015	Chai	nge
	Risk-weighted assets	Capital requirements <sup>3</sup>	Risk-weighted assets	Capital requirements	Risk-weighted assets	Capital requirements

## 1- Credit risk

The amount of weighted credit risk is calculated by multiplying the assets and the off balance sheet by the weight coefficients provided for in Articles 11–18 and 45–47 of circular 16/G/2006. Credit risk depends mainly on the type of commitment and the counterparty.

Risk-weighted assets are calculated from net exposure less guarantees and collateral, then adjusted by risk weight (RW). Off-balance-sheet commitments are also weighted by the conversion coefficient factor (CCF).

## Analysis of credit risk by segment

The following table shows the net and weighted exposure to credit risk for various segments, by type of commitment: on and off balance sheet.

(in MAD thousands)

	(III MAD (IIIOGSalius)			
	Exposure before CRM (EAD) <sup>6</sup>		Risk-weighted exposure after CRM (RWA)	
	BALANCE SHEET	OFF BALANCE SHEET <sup>7</sup>	BALANCE SHEET	OFF BALANCE SHEET
Sovereigns	30,424,504	8,267,638	10,817,665	1,748
Institutions	20,871,789	200,000	139,170	20,000
Credit establishments and equivalent	19,057,862	7,825,095	11,081,684	1,276,456
Corporate	163,877,835	82,676,016	165,798,625	32,498,113
Retail customers	78,652,351	652,712	41,989,491	211,824
Total	312,884,342	99,621,461	229,826,636	34,008,141

## · Analysis of balance-sheet credit risk by business line

The following table shows the net and weighted exposure to Group balance-sheet credit risk by business line.

Breakdown of credit risk by business activity in june 2016 (in MAD billions)

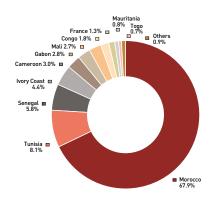

<sup>3)</sup> Calculated as 8% of risk-weighted assets

5) Fixed assets, various other assets, and equity holdings not deducted from capital.

## • Geographic analysis of risk-weighted assets

Below is a breakdown of balance-sheet credit risk, by country of the counterparty bearing the default risk. In compliance with Bank Al-Maghrib regulations, when a country rating is less than B– (e.g., Mali, Mauritania, and Togo), sovereign and corporate risk is weighted at 150%.

#### Geographical breakdown of weighted risks

## 2- Counterparty risk

Market activities (involving contracts with two counterparties) expose the bank to default risk of the counterparty. The amount of risk depends on market factors that might affect the future value of the transactions involved.

## Analysis of net and weighted exposure to counterparty risk, by prudential segment

At June 30, 2016, the Group's net exposure to counterparty risk to security-financed transactions and derivative products totaled MAD **25,275,200** thousand, 118% more than at December 31, 2015. Risk-weighted exposure came to MAD **1,980,015** thousand, 128% more than at December 31, 2015.

(in MAD thousands)

			`	,
	June	e 16	Decemb	per 2015
	Exposure at default (EAD)	Risk- weighted assets (RWA)	Exposure at default (EAD)	Risk- weighted assets (RWA)
Sovereign	14,602,199	0	3,576,214	0

Total	25,275,200	1,980,015	11,615,415	868,990
and equivalent Corporate	5,497,186 5,175,815	1,249,605	757,642	530

<sup>6)</sup> CRM: Credit-risk mitigation: techniques employed by financial institutions to reduce their counterparty risk

7) Off-balance-sheet commitments comprise financial and other guarantees

<sup>4)</sup> Credit risk arising from market transactions, investments, and settlements.

## 3- Market risk

Pursuant to Article 48 of circular 26/G/2006 of Bank Al-Maghrib, market risk is defined as risk of losses due to fluctuations in market prices. The definition comprises:

- · risk related to instruments in the trading book;
- currency risk and commodities risk for all assets on and off the balance sheet except those in the trading book.

Article 54 of circular 26/G/2006 describes the regulatory authority's methods for calculating all categories of market risk.

Market risk comprises:

#### • Interest-rate risk

Interest-rate risk is calculated for fixed-income products in the trading book. It is the total general and specific risk related to interest rates.

Capital requirements for general interest-rate risk are calculated using the amortization-schedule method. Specific risk is calculated from the net position. The weighting depends on the type of issuer and the maturity of the security, on the basis of the criteria listed in the technical note for 26/G/2006 (see Article 54, part I, paragraph A of the technical note for 26/G/2006).

### • Equity risk

The calculation of equity risk comprises: stock positions, stock options, stock futures, index options, and other derivatives whose underlying instrument is a stock or an index. Total equity risk is the sum of general and specific equity risk.

Capital requirements for general equity risk (see Article 54, part II, paragraph B of the technical note for 26/G/2006) represents 8% of the total net position.

Specific risk is calculated on the total position by applying the weightings indicated by the regulatory authority, in accordance with the type of asset.

## • Currency risk

Capital requirements for currency risk are calculated whenever the total net position exceeds 2% of the core capital. The total net position corresponds to the difference between the long and short positions for the same currency.

## Capital requirements for market risks

(in MAD thousands)

Capital requirements	June 16	December 15
Interest-rate risk	420,176	509,929
Specific interest-rate risk	67,081	36,378
General interest-rate risk	353,095	473,552
Equity risk	20,368	9,117
Specific equity risk	8,806	43,793
General equity risk	1,228	587
Total	450,578	563,425

## 4- Operational risk

Operational risk is calculated using annual NBI for the three past years and Basic Indicator Approach.

Capital requirements are 15% of the average NBI for the past three years.

### Capital requirements for operational risk by business line

(in MAD thousands)

Capital requirements	Banking in Morocco, Europe, and offshore zone		International retail banking	Total
June 2016	1,502,922	335,037	799,447	2,637,407
Dec 2015	1,500,893	329,559	767,317	2,597,770

## 5- Credit-risk mitigation techniques

Credit-risk mitigation techniques are recognized pursuant to the regulations of Basel II. Their effect is measured by scenario analysis of an economic slowdown. There are two main categories of credit-risk mitigation techniques: personal guarantees and collateral.

- A personal guarantee is a commitment made by a third party to replace the primary debtor in the event of default by the latter. By extension, credit insurance and credit derivatives (e.g., protective calls) also belong to this category.
- Collateral is a physical asset placed with the bank as guarantee that the debtor's financial commitments will be satisfied in a timely manner.
- As shown below, exposure can be mitigated by collateral or a guarantee in accordance with criteria established by the regulatory authority.

Collateral	Personal guarantees		
Cash, equities, mutual funds, etc. Mortgages	Collateral, Insurance, Credit derivatives		

## Bank Al Maghrib regulations by standardized approach

Eligibility criteria

## • Eligibility of credit-risk mitigation techniques

Attijariwafa bank Group calculates its solvency ratio using the standardized approach, which, contrary to IRB approaches, limits credit-risk mitigation techniques.

For risks treated using the standardised approach:

- personal guarantees are taken into account (subject to eligibility) by enhanced weighting that corresponds to that of the guarantor, for the guaranteed portion of the exposure which accounts for any currency and maturity mismatch.
- collateral (e.g., cash, securities) are subtracted from exposure after any currency and maturity mismatch has been accounted for.
- collateral (e.g., mortgages) that meet eligibility conditions which allow a more favorable weighting for the debt that they guarantee (exclusively for mortgages, buyers, and property leasing whose weightings are between 35% and 50%).

Below is a comparative table of collateral eligible on the basis of two methods: standardized and advanced.

	Standardized	Advanced approach		
	approach	IRBF	IRBA	
Financial collateral				
· Liquidities/DAT/OR	√	√	√	
<ul> <li>Fixed-income securities</li> </ul>

#### CRM amounts

Below are the guarantees and collateral (real and financial) as at the end of June 2016, as well as the hedge amounts for credit risk included in the calculation of risk-weighted assets (standardised approach) at the end of June 2016:

(in MAD thousands)

	June-16
Guarantees and collateral	151,769,785
Guarantees	3,801,424
Real <sup>8</sup> and financial collateral	147,968,362
Guarantees and collateral eligible for the standardised approach	59,612,038
Guarantees	
Real and financial collateral	3,801,424
Mortgage on residential home loan	55,810,614
Mortgage on commercial lease	50,145,596
Other	5,665,018

8) Collateral at the domestic-banking level.

## III. Information on significant subsidiaries

## 1- Regulatory framework

At the parent-company level, Attijariwafa bank must satisfy capital requirements calculated in accordance with the same prudential standards required by Bank Al-Maghrib as those for the consolidated level.

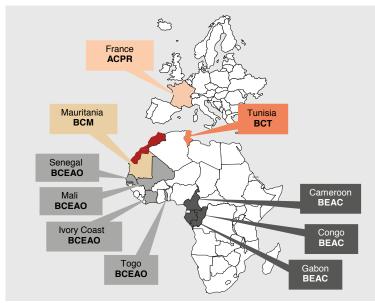

All subsidiary credit institutions in Morocco: Wafabail, Wafasalaf, and Attijari Factoring individually report their solvency ratios to Bank Al-Maghrib, as governed by:

- circular 25/G/2006 (in compliance with Basel I) on calculating capital requirements for credit risk;
- circular 14/G/2013 (see technical note NT 01/DSB/2014) on calculating the regulatory capital of banks and credit institutions (in compliance with Basel III).

Wafa assurance is governed by the regulations of the Autorité de Contrôle des Assurances et de Prévoyance Sociale (ACAPS, the Moroccan insurance regulatory authority).

Attijariwafa bank Group's international banking subsidiaries calculate their capital requirements in accordance with local prudential standards in the jurisdictions of the countries in which they do business. They are in compliance with Basel I standards in Africa (Tunisia, Mauritania, WAEMU, CAEMC) and with Basel III standards in Europe.

## Regulatory authorities of Attijariwafa bank international subsidiaries

**BCT**: Tunisian Central Bank

**BCM**: Mauritanian Central Bank

**ACPR**: Prudential Supervisory Authority

**BCEAO**: Central Bank of West African States, which oversees banks operating in the WAEMU

**BEAC**: Central Africa Bank that oversees banks operating in the CAEMC zone

## 2-Ratios of principal subsidiaries

The following table provides information on the solvency of Group subsidiaries. The parent-company scope corresponds to in-house outstandings.

Entity	Regulatory authority	Required minimum	Regulatory capital requirements (thousands)	Risk-weighted assets (thousands)	Total ratio	Regulatory capital requirements <sup>9</sup> (MAD thousands)	Risk-weighted assets (MAD thousands)
Attijariwafa bank	Bank Al-Maghrib	12%	27,474,777	222,465,919	12.35%	27,474,777	222,465,919

Entity	Regulatory authority	Margin	Minimum solvency margin	Ratio
Wafa Assurance	ACAPS	5,297,893	1,580,889	335.12%

## IV. Internal capital management

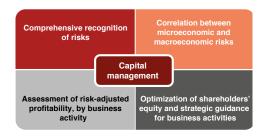

## 1- Capital management

In recent years, the forecasting of capital requirements has become a vital part of Attijariwafa bank Group's strategic planning. Since Bank Al-Maghrib adopted Basel II in 2006, regulations have undergone constant change, resulting in ever-increasing needs for capital.

The Group's capital-management policy is designed to control this costly obligation and all associated factors. The policy aims to ensure that the Group and its subsidiaries remain solvent and satisfy prudential requirements on both the consolidated and parent-company levels (respecting prudential rules of the local regulatory authority) while simultaneously optimizing returns for shareholders, who provide the required capital.

The capital-management policy extends beyond the regulatory framework, to overseeing investments and their returns (calculations of IRR, dividend forecasts, divestments, tax engineering, etc.), thereby ensuring optimal capital allocation for all business lines and fulfilling capital requirements for both strategic goals and regulatory changes.

Targets for «Capital Management»

## 2- Governance

The Finance Department's Capital Management Committee (CMC) meets quarterly, under the supervision of General Management, in order to:

- define the capital-management policy and the changes needed on the basis of market conditions and competition, regulations, interest rates, cost of capital, etc,
- anticipate capital requirements for the Group and its subsidiaries and credit institutions, for the next 18 months;
- analyze capital allocation by business line and division;

make decisions on subjects that can impact capital (all Group entities).
 In general, support all actions and initiatives that promote optimized capital management.

## 3- Regulatory stress tests

The results of regulatory stress tests (Bank Al-Maghrib directive 01/DSB/2012) are reported twice yearly to the regulatory authority.

At the end of June 2016, post-shock solvency ratios for Tier 1 and total capital of Attijariwafa bank were superior than the minimum regulatory requirements.

Regulatory stress tests at the end of June 2016 covered the following scenarios:

**Credit risk:** claims rising from 10% to 15%, representing high risk for total portfolio and per business segment

Concentration risk: default of key business relationships

## Market risk:

MAD weakening against the EUR;

- MAD weakening against the USD;
- yield curve shifts;
- · interest rates rise;
- share prices fall;
- · NAVs of mutual funds (bond, money market, etc.) decline.

## Country risk:

- stress tests on loans to non-residents in countries with political instability;
- · stress tests on loans to non-residents in countries to which the bank

## V. Corporate Governance

Governance system established adheres to the general corporate principles. This system consists of six control and management bodies emanating from the Board of directors.

### **Board of Directors**

The Board of Directors (BD) consists of a group of institutions and individual persons (administrators) in charge of managing the bank. They are appointed by the shareholders general meeting. The BD includes several members including a chairman and a secretary.

Any institution which is member of the BD appoints an individual person to represent it. The organization and the prerogatives of the BD are set by the bank by-laws and are subject to national law.

## 1- General Management Committee

The general management committee joins together the heads of the various centers under the chairmanship of the Chairman and Chief Executive Officer.

This Committee meets once a week and provides a summary view of the operational activities in the different sectors and prepares questions to be submitted to the Board of Directors in a joint approach.

Member	Function	Since
